Problems In Online Shopping App

- Adding a new Product? ✗
- Deleting a Product? ✗
- Data sharing between Posts & Post Details ? ✗

Redux

`npm i redux`

Actions
Notification to Reducers that Data has to be changed

{type:"DELETE_PRODUCT", payload:1}
Dispatch an action

function ProductsReducer(store,action){ ... biz logic to update store & return updated store}

Reducers
Business Logic to Change Store Data

Store
Global data { posts,products}

`npm i react-redux`

<Provider/>

useSelector()
useDispatch()

React - Online Shopping

Product Item
🗑

Action
type : DELETE_PRODUCT
payload : Product Id

Reducers

Store - products:[], posts:[]

posts → Posts Reducer

products → Products Reducer

Client → Request → Server

Server → Client

JWT Token (Encoded)

2. Create a JWT
